JERRY KITCHEN & BATH LTD

Butler Sink

We offer a variety of handcrafted butler sinks from ceramic fire-clay to suit your farmhouse or traditional style home.

The Butler/Farmhouse styled sinks from Jerry Kitchen & Bath are a range of timeless classics.

Tasteful

The designs are tasteful and roomy and complement any kitchen. In recent years, bowls in the Butler/Farmhouse style have gained popularity as a home accessory.

Another often used space in a contemporary home is the kitchen sink.

The Premium Ceramic bowls are smooth and velvety to the touch and are individually handcrafted with a fireclay finish. With the proper maintenance, the firm, non-porous surface offers good resistance to the majority of widely used chemicals and detergents and heat resistance. The Stainless Steel styles include gorgeous brushed fronts and 1.2mm thick, brushed stainless steel for a contemporary spin on a timelessly elegant design. Our extensive range of farmhouse sinks alters your kitchen or laundry room while remaining functional and aesthetically beautiful. They are a necessary centrepiece for any kitchen.

The elegant, thick-walled copy of the classic Victorian design that we call Butler Sinks is now the new modern. Large bowls from the Butler collection are perfect for bigger things like baking trays and oven racks.

Ceramic sinks in Modern Designs and Applications.

These sinks can occasionally be fitted under-mount, like a semi-recessed basin, or even as counter basins, giving the impression that the sink is a small freestanding bath in the kitchen.

If your space is limited and you're thinking about getting a ceramic sink, consider the bench's dimensions before choosing a single or double bowl sink. It would help if you also decided whether you want to go for the full classic look and take towel rails, a dishwashing machine, soap dispensers, and the size of the tallboys into consideration.
